

A Guide for Running Capitalism Lab on Mac

Capitalism Lab runs on Windows

In order to run Capitalism Lab, which is a native Windows application, on macOS, you will need to set up a virtual machine.

A virtual machine (VM) allows you to run another operating system on top of your existing one.

While there are various VM providers available for macOS, we recommend using VMware Fusion Player, which is free for educational and personal uses.

VMware Fusion Player

- Visit the website: <https://www.vmware.com/content/vmware/vmware-published-sites/us/products/fusion/fusion-evaluation.html.html>
- Register for a personal license which is free.

VMware Fusion 13

VMware Fusion delivers the best way to run Windows, Linux and more on Apple Macs without rebooting.

Fusion 13 supports Macs with either Intel or Apple silicon running macOS 12 and newer, and includes features for developers, IT admins and everyday users.

Use the links below to start your free, fully functional 30-day trial, no registration required, or register for a free personal use license of Fusion Player.

Manually Download

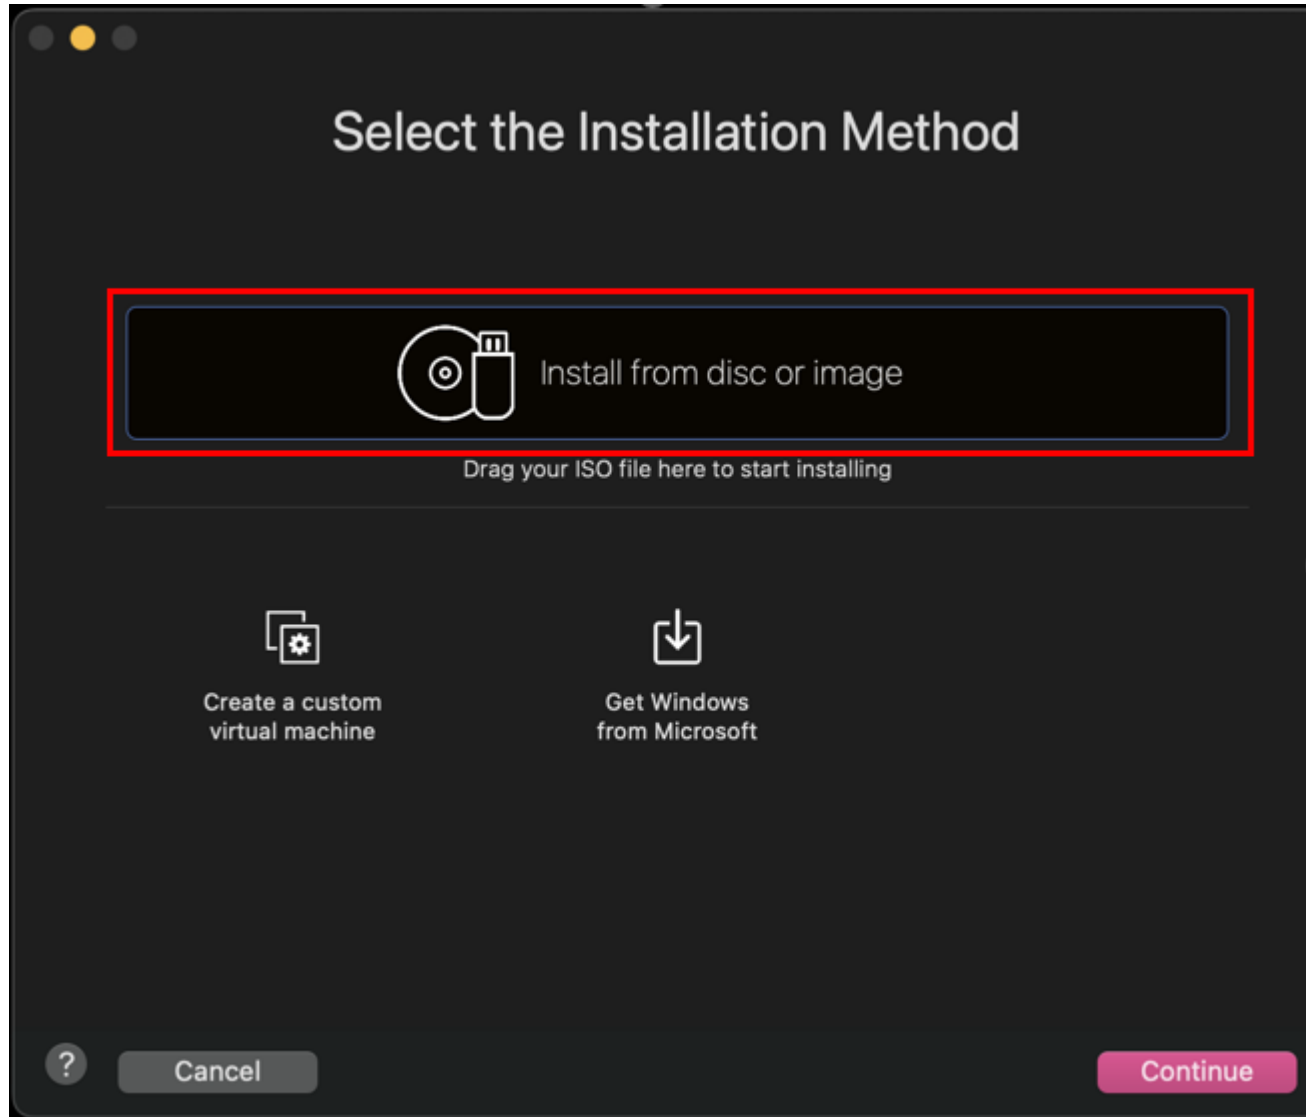

Install the downloaded VMware Fusion Player

After the installation, open VMFusion Player from Command Centre

Select “Install from disc or image”

Download and Install Windows ISO for Your Mac

There are two types of Mac computers:

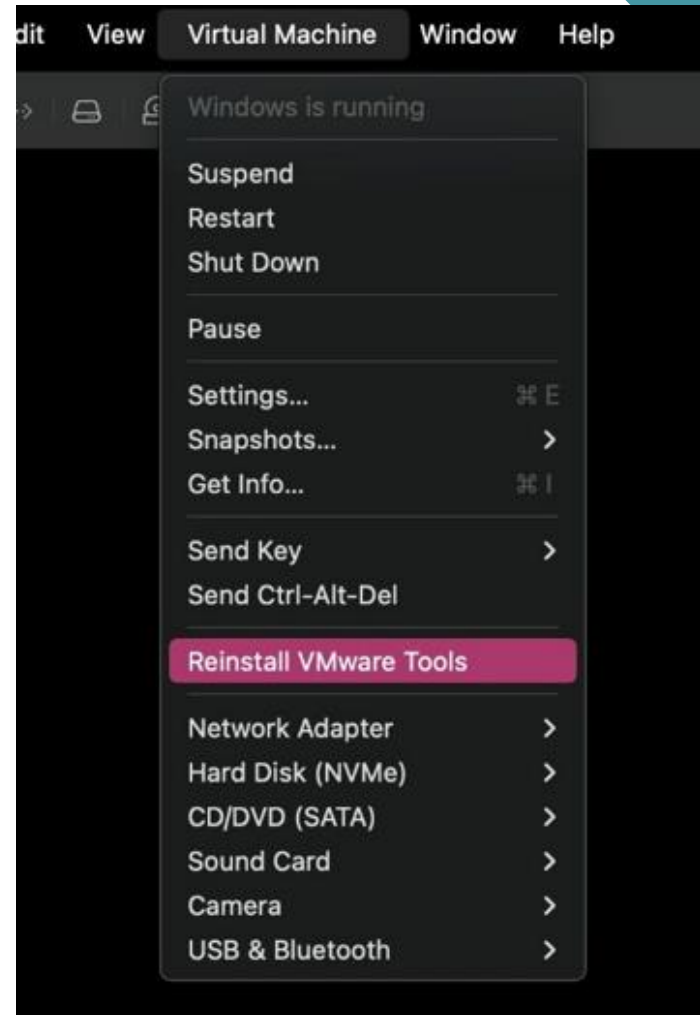

1. Intel-based Macs: For this type, you can download the ISO file directly from [Microsoft Windows website](#).
2. Apple Silicon-based Macs (including M1, M2, and M3 series): For this type, you can obtain the ISO file from [our cloud drive](#).

After downloading the ISO, follow the instructions in this article for the installation process <https://kb.vmware.com/s/article/2128765>

Also Install VMware Tools

Follow the instructions in this article to install VMware Tools:

<https://kb.vmware.com/s/article/1014294>

Now You Can Install Capitalism Lab

Follow the instructions on this webpage to install Capitalism Lab on Windows: <https://www.capitalismlab.com/install-register-instructions/>

Additional Resources

There are YouTube tutorials available from other creators that provide instructions on how to install Windows 11 on M1/M2 Macs using VMWare Fusion. You can find one such tutorial at <https://www.youtube.com/watch?v=cygsGM5sNJo>

Please note that if you are using Apple Silicon versions, make sure to use the ISO file from the link in this presentation file.

If you encounter any difficulties during the setup process, please feel free to contact us for assistance at info@enlght.com.
